### 1.1.3 HUMAN RESOURCE INFORMATION SYSTEM (HRIS)

#### MEANING OF HRIS

a systematic procedure for collecting, storing, maintaining and retrieving data needed by an organisation about its human resources and various activities that are relevant for their management.

Handwritten mathematical work on a chalkboard, including a table and several equations.

	A	B	Total
HRIS	50000	60000	110000

Equations and calculations:

$$S = \frac{F + P}{10000}$$
$$= \frac{20000 + 30000}{10000} = \frac{50000}{10000} = 5\%$$
$$C = 20000 \times 30\%$$
$$C = 60000$$
$$C = F + P$$
$$60000 = F + 40000$$
$$F = 60000 - 40000$$
$$F = 20000$$

Additional calculations on the left side of the board:

$$= \frac{20000 + 30000}{10000} = \frac{50000}{10000} = 5\%$$
$$= \frac{60000}{10000} = 6\%$$
$$= 20000$$
